DISPLAY FLATS are especially designed in
Holland to avoid waste...

Regular Holland crates were good for one purpose only. Namely, transporting the bulbs from Holland warehouse to our customer. After that they usually had to be burned. Now this NEW PATENTED CRATE has practically no waste. It consists of 5 flats which are ready for counter display and when emptied can be used for greenhouse work, storage. The crate offered consists of 5 flats with short pegs, top lid and 2 wires. Very strong, sturdy and light weight.
